CSA1508 CLOUD COMPUTING AND BIG DATA ANALYTICS
LAB EXPERIMENT
EXPERIMENT 1: FLIGHT RESERVATION SYSTEM

Aim

To create a simple cloud software application for a Flight Reservation System using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure

1. Log in to Zoho Creator and create a blank application named **Flight Reservation System**.
2. Create a form named **Flight Booking**.
3. Add fields for Trip Type, From, To, Departure Date, Travelers, Class, Fare Type, and Flight Type.
4. Configure Trip Type with the options **One Way** and **Round Trip**.
5. Add suitable choices for From, To, Class, and Fare Type.
6. Configure Flight Type with the options **Domestic** and **International**.
7. Enter sample flight reservation details and submit the form.
8. Open the associated report and verify the submitted reservation details.

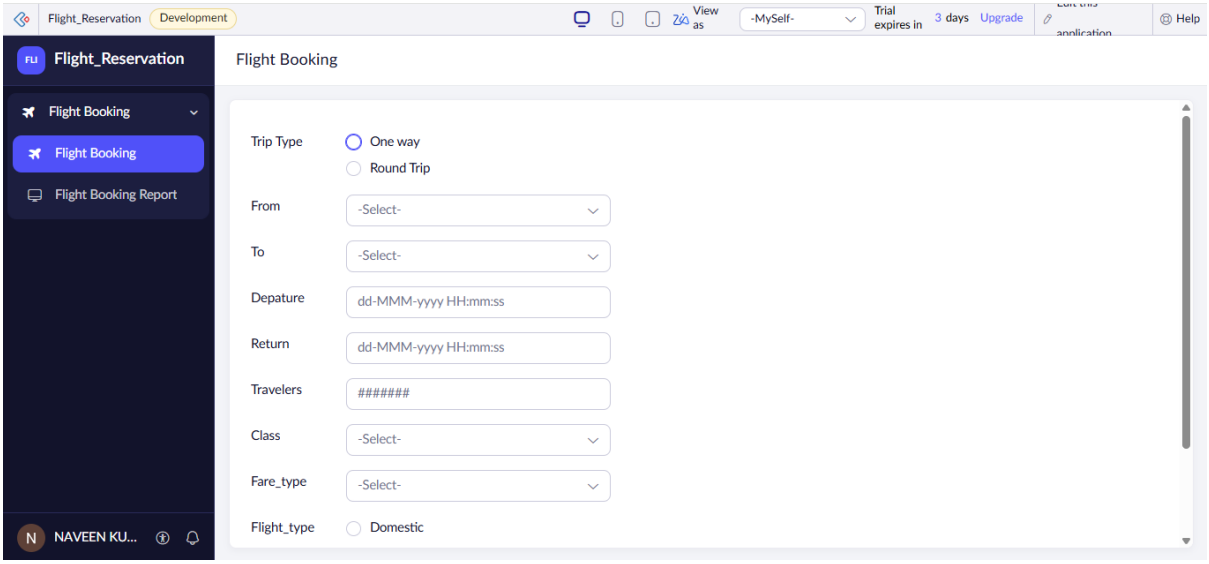

Result

Thus, a cloud-based Flight Reservation System was created using Zoho Creator, and flight reservation details were stored and displayed through a report to demonstrate SaaS.

EXPERIMENT 2: PROPERTY BUYING AND RENTAL SYSTEM

Aim

To create a simple cloud software application for the Property Buying and Rental Process in Chennai using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure

1. Log in to Zoho Creator and create a blank application named **Property Buying and Rental System**.
2. Create a form named **Property Details**.
3. Add fields for Property Requirement, Property Type, Rental Agreement, Rental Agreement Area, Place, Range, and Property Value.
4. Configure Property Requirement with the options **Buy** and **Rent**.
5. Configure Property Type to include **Commercial**.
6. Configure Rental Agreement with the options **Yes** and **No**.
7. Add suitable Chennai locations and property value ranges to the respective fields.
8. Enter sample property details and submit the form.
9. Open the associated report and verify the stored property information.

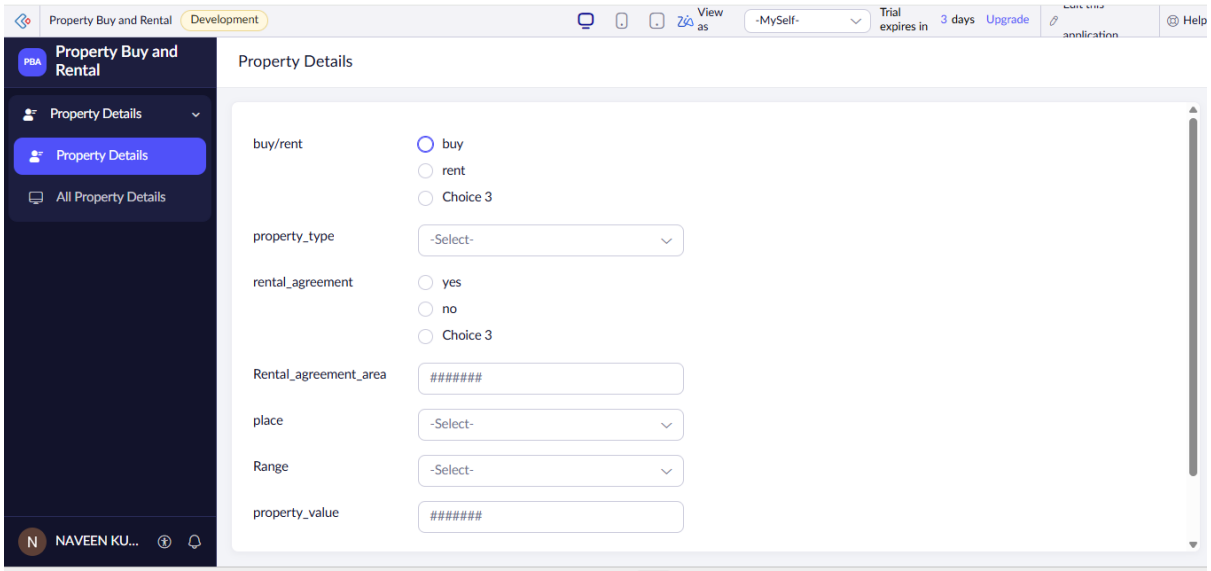

Result

Thus, a cloud-based Property Buying and Rental System was created using Zoho Creator to record and display property details for Chennai city, demonstrating SaaS.

EXPERIMENT 3: CAR BOOKING RESERVATION SYSTEM

Aim

To create a simple cloud software application for a Car Booking Reservation System using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure

1. Log in to Zoho Creator and create a blank application named **Car Booking Reservation System**.
2. Create a form named **Car Booking**.
3. Add fields for Search for Cabs, From, To, Booking Type, Package Type, and Hours/Days.
4. Configure Search for Cabs with suitable vehicle choices, such as Sedan, SUV, and Hatchback.
5. Add suitable locations to the From and To fields.
6. Configure Booking Type with the options **Rental** and **Out Station**.
7. Configure Package Type with suitable travel packages.
8. Enter sample car booking details and submit the form.
9. Open the associated report and verify the submitted booking information.

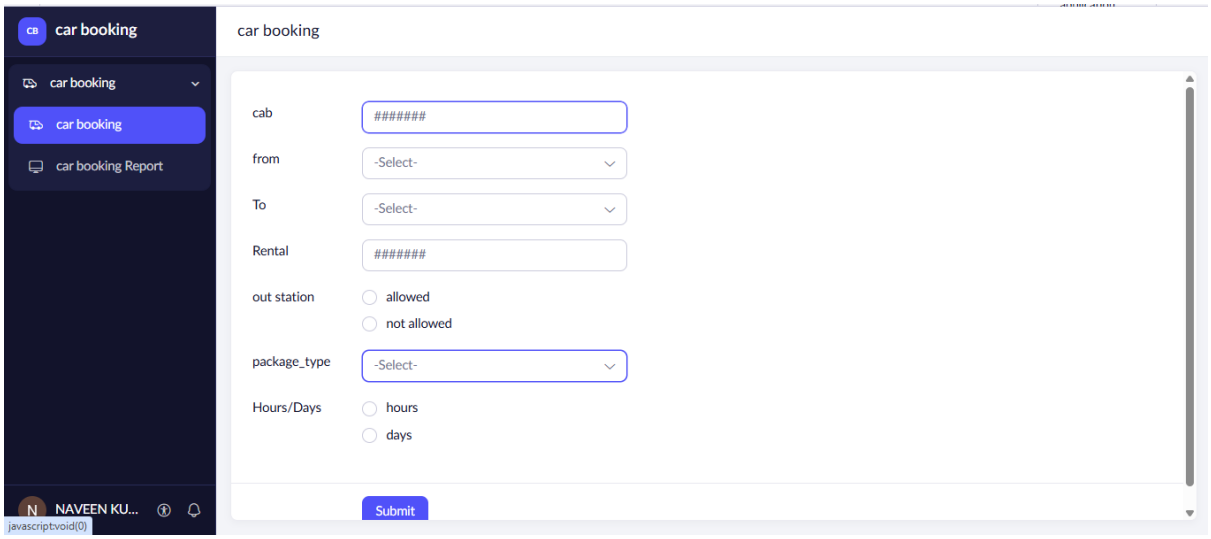

Result

Thus, a cloud-based Car Booking Reservation System was created using Zoho Creator, and car booking details were stored and displayed through a report to demonstrate SaaS.

EXPERIMENT 4: SIMATS LIBRARY BOOK RESERVATION SYSTEM

Aim

To create a simple cloud software application for the SIMATS Library Book Reservation System using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure

1. Log in to Zoho Creator and create a blank application named **SIMATS Library Book Reservation System**.
2. Create a form named **Library Book Details**.
3. Add fields for Title of the Book, Author, Publication, Year, Edition, Number of Copies, Rack Number, and Status.
4. Configure Edition with suitable edition choices.
5. Add the number of copies and rack number fields.
6. Configure Status with the options **Taken** and **Returned**.
7. Enter sample library book details and submit the form.
8. Open the associated report and verify the stored book information.

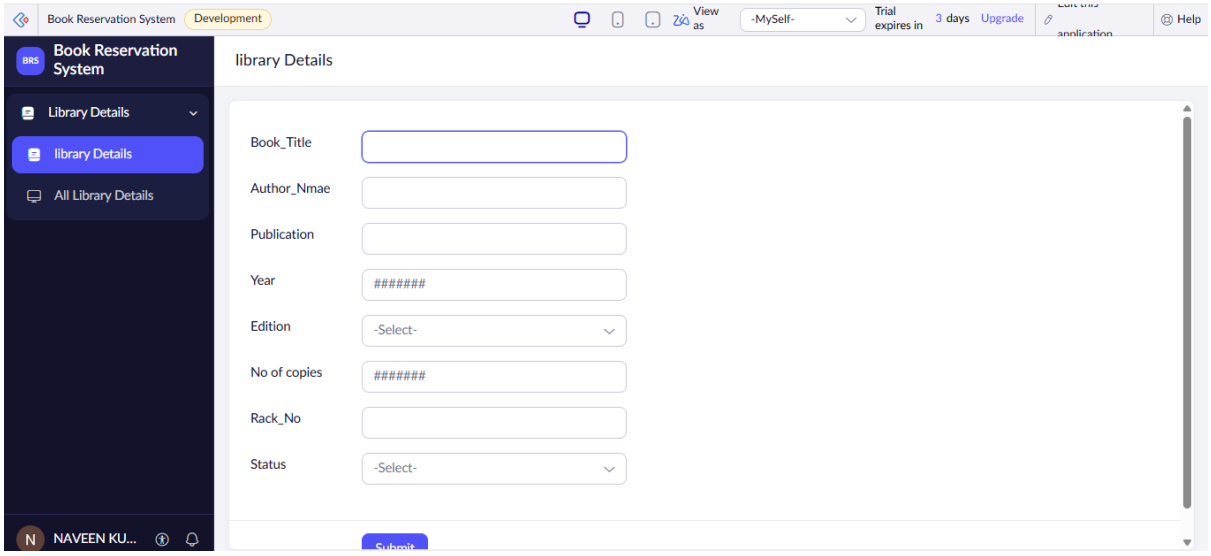

Result

Thus, a cloud-based SIMATS Library Book Reservation System was created using Zoho Creator to record and display book details, including publication information, rack number, number of copies, and status.

EXPERIMENT 5: MARK SHEET PROCESSING SYSTEM

Aim

To create a simple cloud software application for a Mark Sheet Processing System using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure

1. Log in to Zoho Creator and create a blank application named **Mark Sheet Processing System**.
2. Create a form named **Student Mark Sheet**.
3. Add fields for Student Name and Register Number.
4. Create Number fields for the marks obtained in the required subjects.
5. Add fields for Average, Percentage, Rank, and Overall Performance.
6. Configure Overall Performance with suitable options, such as Excellent, Very Good, Good, and Average.
7. Enter sample student details and subject marks.
8. Calculate the average and percentage using the appropriate formulas, if automatic calculation is required.
9. Submit the form and open the associated report.
10. Verify the student details, marks, average, percentage, rank, and overall performance.

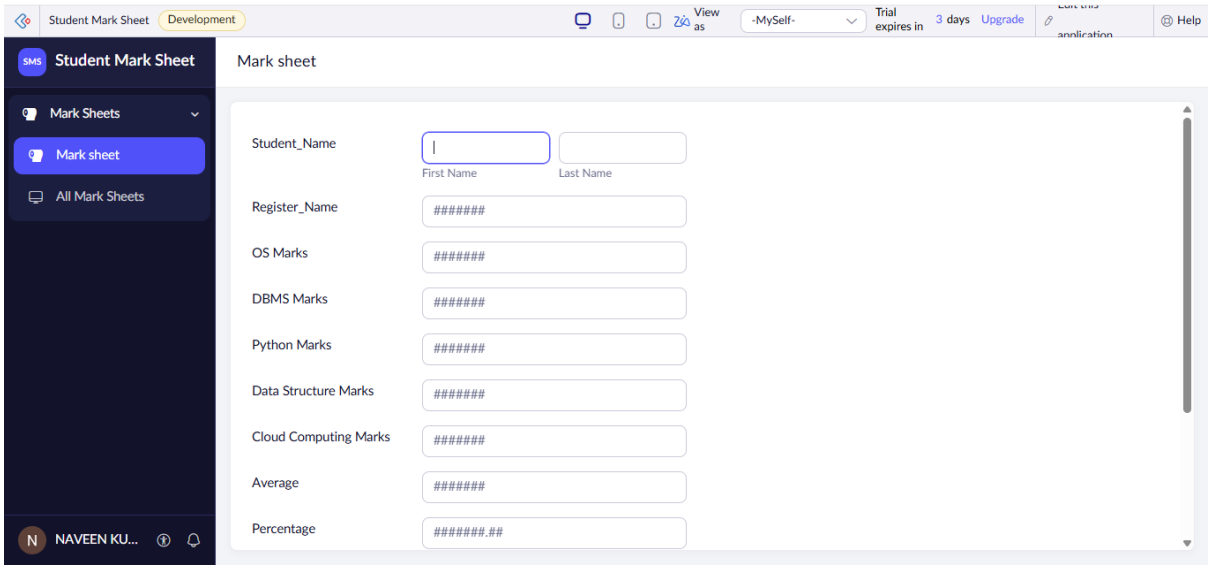

Result

Thus, a cloud-based Mark Sheet Processing System was created using Zoho Creator to store and display student details, subject marks, average, percentage, rank, and overall performance, demonstrating SaaS.
